

Donut - Steem 2.0 on Polkadot

1-1 A public content platform

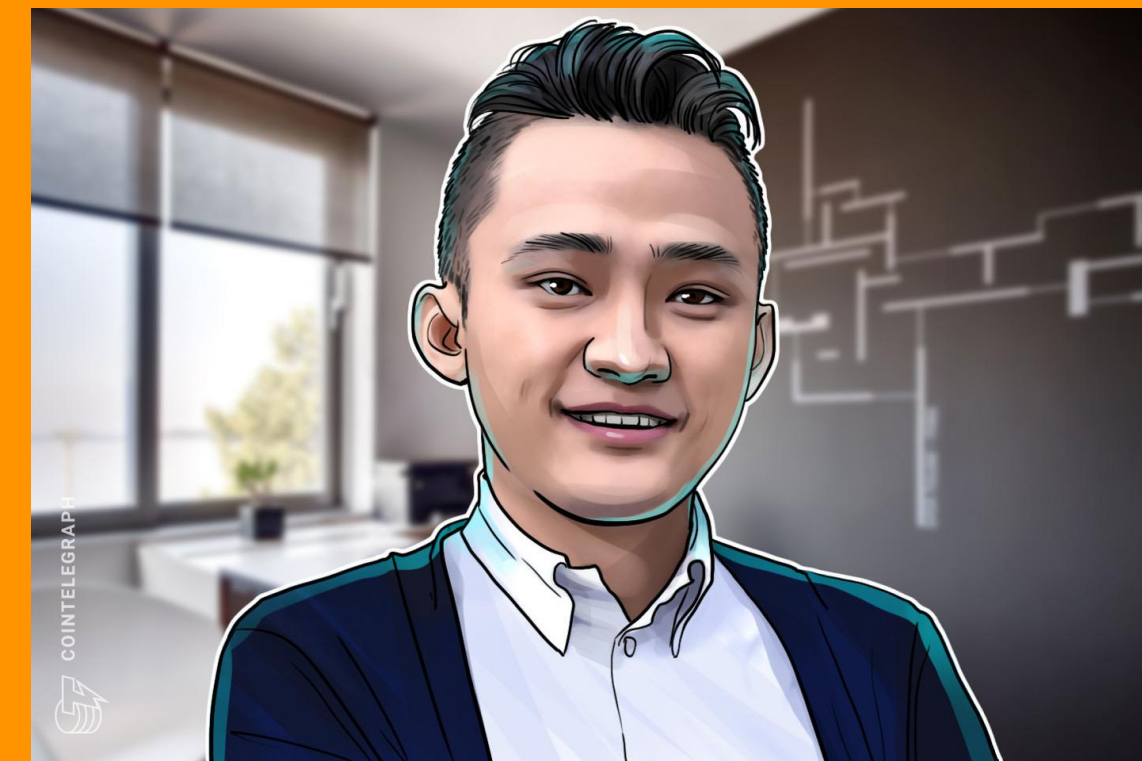

The Steem blockchain was founded in 2016 by BM and Ned. The value of Steem relative to public content is the same as the value of Bitcoin relative to electronic cash.

ByteMaster

Many people know that ByteMaster founded Steem, but they don't know that Steem used to have **50k+ DAU** and **1.4 million** users in **60+ countries** around the world.

Justin Sun

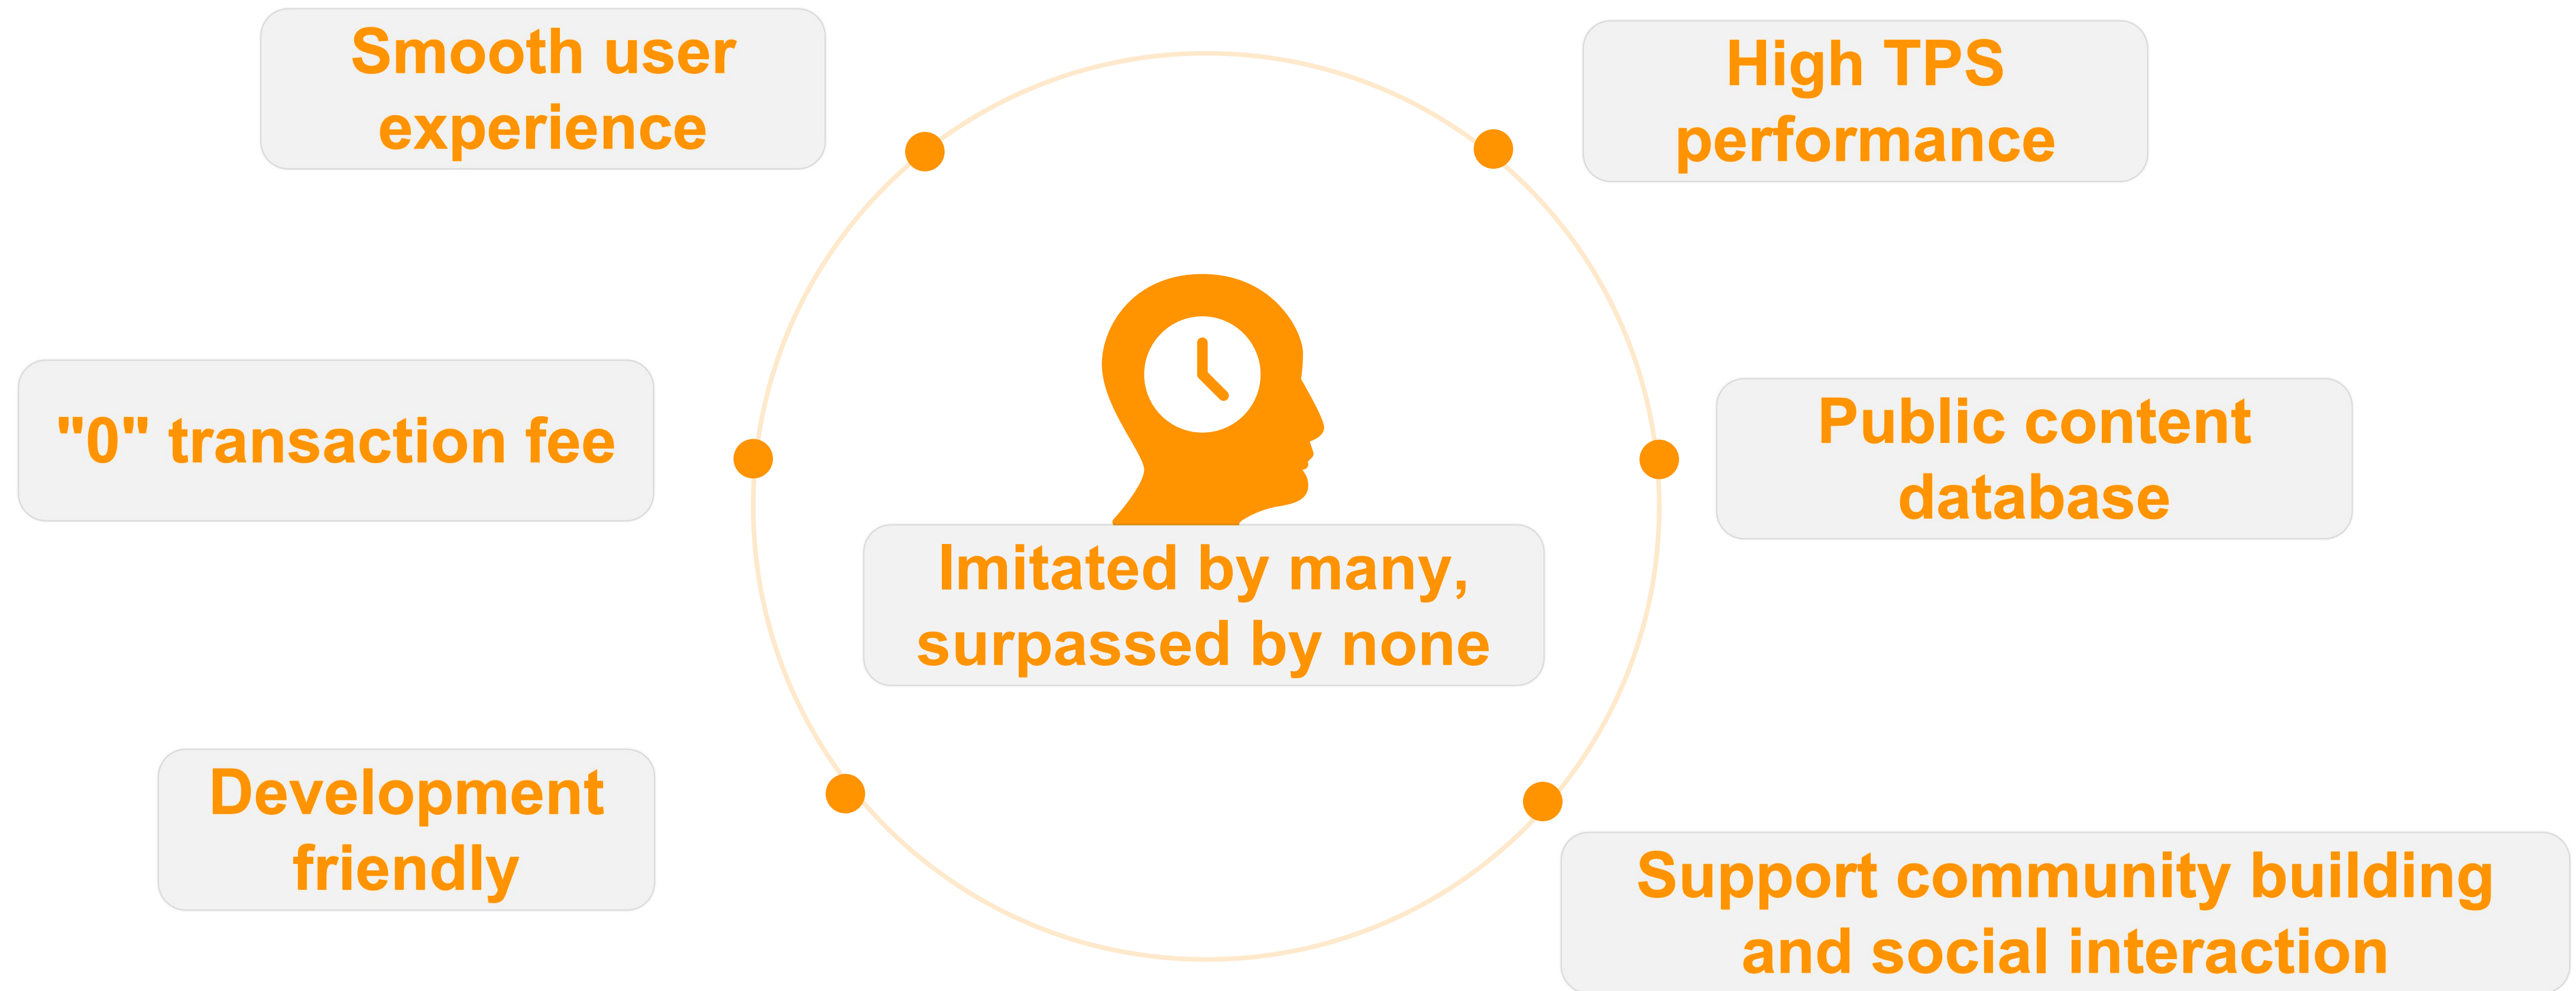

Many people know that Justin Sun acquired steemit, but they don't know that Steem has hundreds of communities. **7 of the top 10** social DApp in the world are from Steem.

Donut
Steem 2.0 on Polkadot

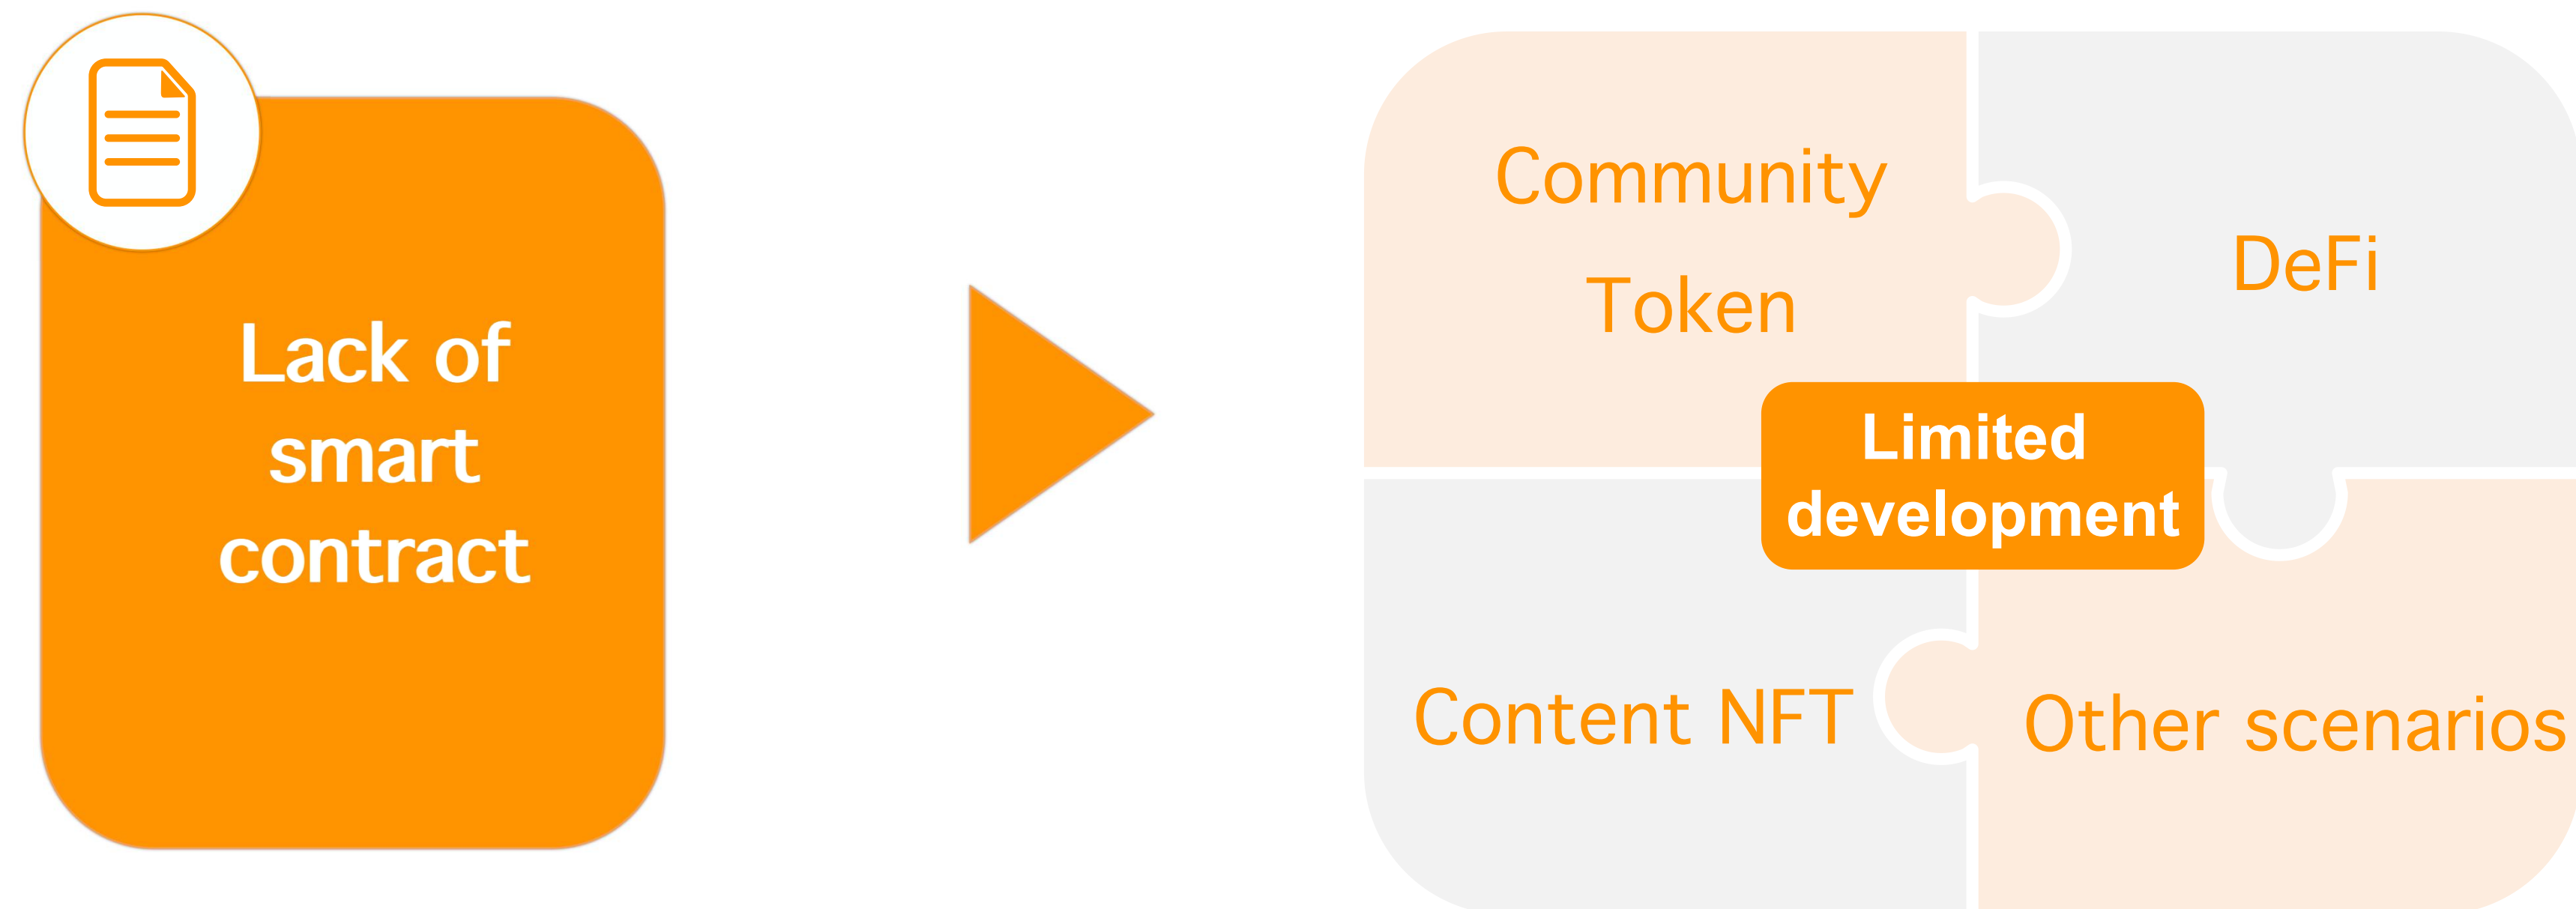

1-2 ▶ A proprietary blockchain

02 Smart Media Tokens is dead in the water

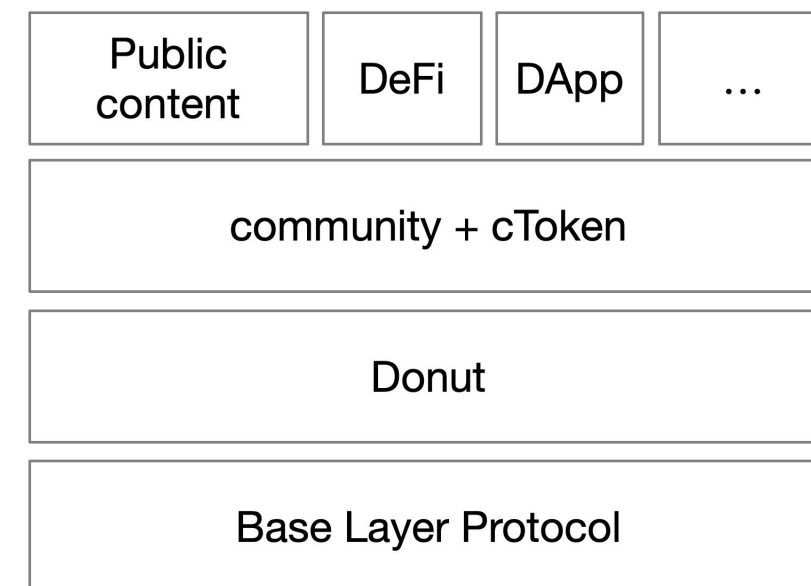

SMT is a token protocol that supports content websites/applications, online communities, and communities to issue community tokens and encourage their community building and social interaction.

After three years of development, it has not yet been launched.

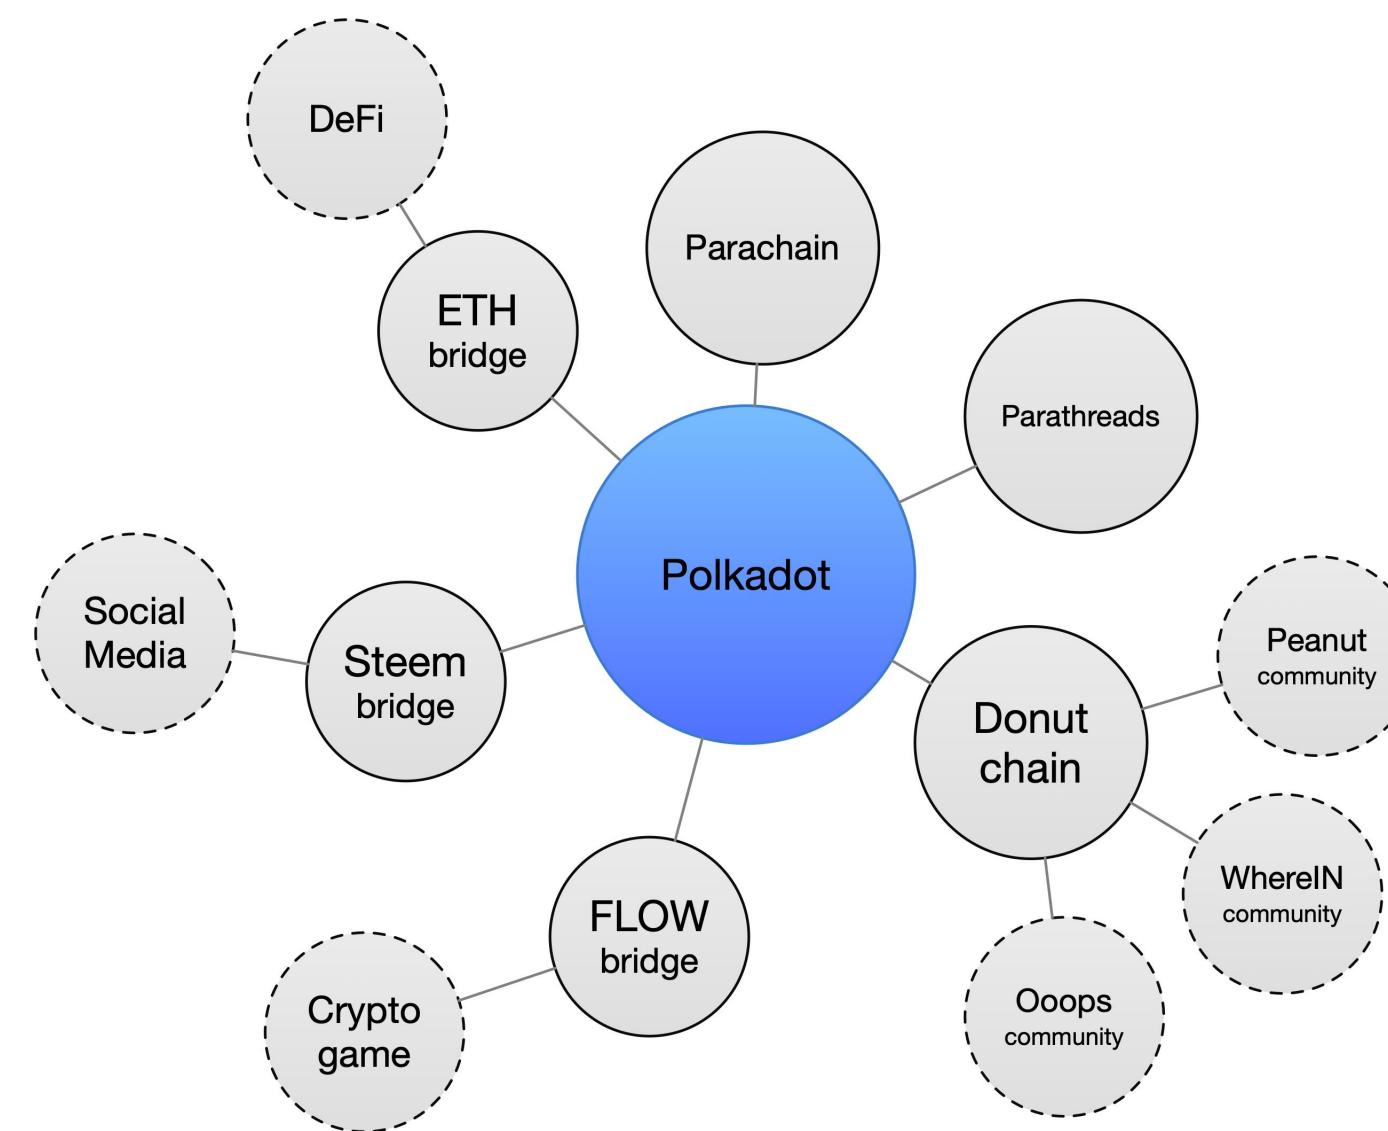

03 Donut - Steem 2.0 on Polkadot

Bridge the Steem blockchain and Polkadot and implement Steem 2.0 on Polkadot. Implement cross-chain intercommunication with other blockchain protocols, modularize community tokens, DeFi, and content NFTs to help communities achieve digitalization.

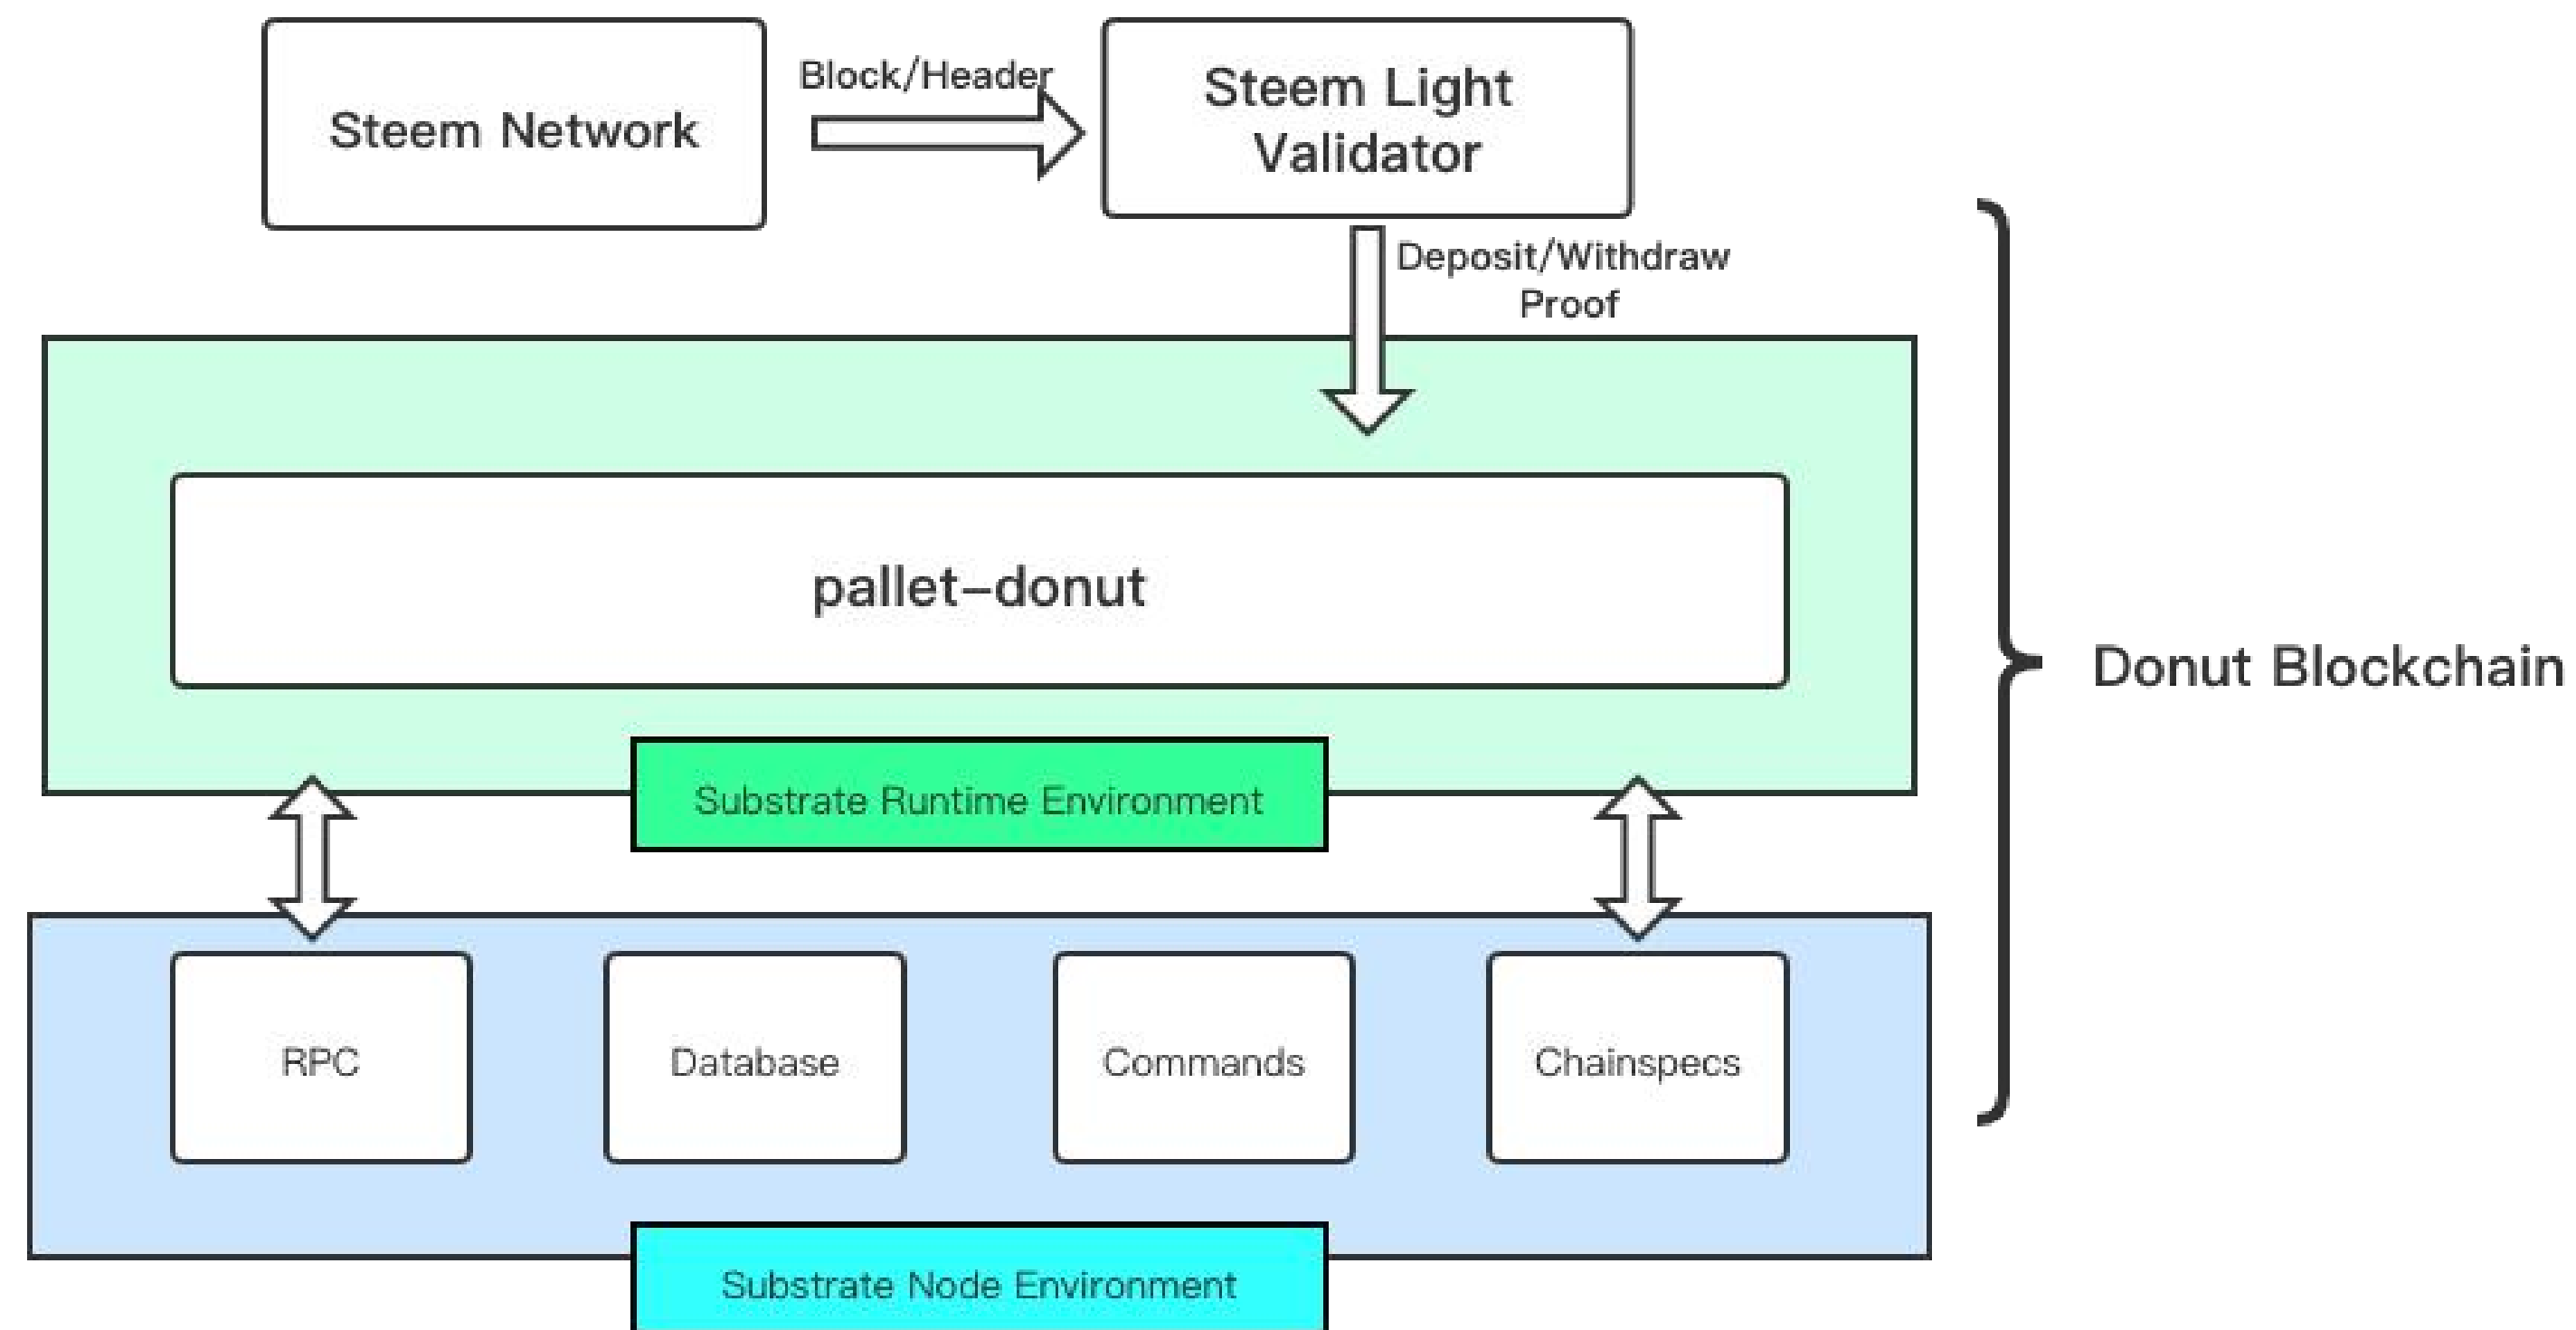

An intermediate layer between Base Layer Protocol and Community

Cross-chain interoperability with other basic layer protocols through Polkadot

04 Donut Cross-chain bridge

Donut uses cross-chain bridge technology to link assets in the Steem network and Donut network.

05 Application scenario

Community Token

Help content websites, online communities, and communities to tokenize

DeFi

Configure community DeFi for the tokenized community

NFT

Integrate high-quality content with NFT to create a new content ecology in the Web3.0 era

06 Roadmaps

Mar	●	Donut Cross-chain bridge
Apr	●	Integrate Steem with NFT
May	●	One-click configuration of SCO fundraising, community DeFi, NFT
Jun	●	Unite the communities in Chengdu to help them build digital communities
Jul & Aug	●	Participate in the parachain slot auction, if it goes well, become a Donut parachain
Sep	●	Donut parachain will launch the Donut module and officially launch it to the market

07 ▶ Donut Token

Do not consider issuing tokens

08 Why us?

Our team has 3 years of continuous blockchain development and operation experience, and is familiar with the development of Polkadot, Ethereum, Steem, BTC, Near, etc.

Nutbox

NO.2 in Steem blockchain staking community

WhereIn

- NO.7 in the global social Dapp
- One of the 21 super nodes of the Steem blockchain

Ooops

Local social media based on blockchain

Donut
Steem 2.0 on Polkadot

09 Our team

Founder

Guazi

The founder of Steem community
of Chinese, Nutbox, WhereIN and
Ooops

a researcher of open resource

Robert Yan

Technical director of global top big-
data company, a researcher of open
resource blockchain

Blockchain core developer

wengFeng

Former core developer of BTG
professional platform developer of
Bitcoin, Ethereum, Polkadot

Algorithm engineer

WangXi

the core development member
of Nutbox development

token economy designer

Armnio

Master of SWUFE and KTH,
Former co-founder of Xianggu Tank

Back-end engineer

jintli

Polkadot Ecological Enthusiasts , Dedicated
to the research of distributed systems

Thanks !
